THE VVEST INDIA Or *JAMAICA* ALMANACK 1674.

It being the second from the *Bissextile*, OR

LEAP-YEAR.

Comprehending the Planetary Motions and Aspects for each day in the year; Eclipses of the Luminaries; and an Astrological judgment on the success of that noble Country for the ensuing Revolution.

With an accompt of some of the many Commodities, and growth of that excellent and fruitful Island Intended as well for the service of Merchants and Seamen, and all such as shall Trade or Travel thither, in general, as for the Honourable and worthy Inhabitants thereof in particular.

And that it may be the more universally useful, to all his Majesties good subjects, our Countrymen, in the West-Indies, *viz* in *Barbado's*, *Mævis*, *Antego*, *&c.* here is added a domifying Table fitted exactly to the Latitude of the *Barbado's*, which with the *Ephemeris*, is of advantage to all the other Caribbee Islands, at least in matters indifferent.

By *JOHN GADBURY* Student in Astrology and Physick

If I ascend into Heaven, thou art there---If I take the wings of the morning, and dwell in the uttermost parts of the Sea, even there shall thy hand lead me, and thy right hand shall hold me. Ps. 139. v. 8, 9, 10.

London Printed for the Company of Stationers.

BIBLIOTHECA · BODLEIANA

To the ever *honourable* and *Learned* Gentleman, (that grand Propagator of *Engliſh Honour* and *Power* in the *WEST-INDIES*) Sir *THOMAS MODYFORD* Knight and Barronet, Late Governor of *JAMAICA*, and of ſundry other parts of his Majeſties Empire in *AMERICA*: JOHN GADBURY, the unworthy *Author* hereof (In humble acknowledgment of his moſt *Noble Favours*, in readily *aſſiſting* him for the better accompliſhment of *this ſervice*; as alſo, in a *Juſt* and *Grateful* remembrance of all his *Honourable* and *ſucceſsful* Actions and *endeavours* in the *Promotion* of an *Engliſh Intereſt* in the *Remoter* parts of the world) Doth Crave leave to *Dedicate* theſe his *Weſt-Indian Aſtrological Labours*, for this Preſent year 1674.

To the Reader.

The last year (having bin often requested by Letters from my worthy and ingenious Friend, Captain *William Ryves* of *Yallahs* in *Jamaica*, to consider the difference of *Meridians*, and the Relation also, that was between *England* and that noble Countrey, and so to remember it in my *Annual* Observations: and (which is more) having recieved the earnest of a generous remembrance from many of the worthies of that Countrey by means of the said Captain *William Ryves*, who, it seems, was pleased to render me to them by a Character more deserving, than modesty can give me leave to account or esteem my self: and yet I must needs confess, that no man living can more value or love his Countrey or Country-men than I do.) I in gratitude to that my ingenious friends desires, and in a just sence of the great obligations I have to the Nobles of that Countrey, wrote an *Ephemeris* for that worthy Island, and Printed therewith the Nativity thereof, calculated for 180 years from the time the *English* were possessed of it in *Anno* 1655.

And, although it was the first of its kind, that I ever knew performed by any, and therefore possibly, might be liable to some imperfections, yet finding it courteously received by all the Honoured and ingenious persons both in *England*, and in the *Indies*, I have adventured upon a second Essay for the year 1674. and therein have amended what was erroneous in the former, & added what I could in so small a room, of the Commodities and growth of that famous Countrey; that the *English* Nation may thereby see and know, that *Jamaica* is not so poor and mean a place as some malicious and cowardly spirits esteem it; but rather like another *Canaan*, it floweth with abundant plenty of all things useful for the support of mankind.

I know several persons object sundry things against it; as particularly the great heats of that place To which I answer, that the heat is purely natural and preserving, and no ways hurtful at all; there being generally as much shaddow as Sunshine, (the day and night there are nearly equal all the year round, as by a Table of the Sun-rising and setting in that Countrey, herein placed, doth sufficiently appear) thereby happily qualifying the greatest heats, and rendring them rather an advantage and comfort to humane

mane Life, than any prejudiceth hereunto. Besides, there are generally curious Breezes of wind, and pleasant refreshing showers, at apt seasons, which so conveniently moderate the heats, that they cannot prevail to do any injury either to men or things, any more than in other parts of the Universe, *viz.* when the *Solum & Cælum* both concur; and of this the constant fruitfulness of that noble Countrey is a most undeniible proof.

And, whereas, it is alledged that few persons go thither, but are compelled to encounter diseases. I answer, the objection is not always true; nor indeed scarce true at all. Unless in the same sence, as we may alleadge of *Ireland*, *Kent*, &c. who ever went into *Kent* without danger of an Ague? or indeed, but a League to Sea without the trouble of a little discomposure? Or to *Ireland* without hazzard of the *Flux*? We all know, that some Countreys inherit particular diseases, even as persons; and they are more certainly hereditary to them. And if a man's particular Constitution be but firm and good, and he keep but temperate, and fly debauchery and vice, there is no Countrey can be unhealthful to him. Is not the whole Earth as the *Psalmist* sings, *the Lords*? And hath he not given it for a habitation to the sons of men? Who then can be so ungrateful to Heaven, as to distrust Gods universal providence, or his care of his Creation! But, to go a little further, to the Conviction of the slothful objector. How many delicate persons of curious Birth and Education, do inhabit there without the least danger? Is the lazy Opponent better then they? If such persons can endure the Heat without danger, surely much more may the Grosser bodies and more hardy sort of People endure the same, did not something more than the causeless fear of sickness prevent them.

But some again do urge the danger of the Seas. And this is an objection that shews them rightly to belong to the Regiment of *Salomons* Sluggards, who ever are supposing a Lyon in the way. Thou Fool! who ever thou art that thus objectest, dost thou think that God Almighty (who takes such care of *Sparrows, that not one of them falls to the ground, without his special providence and peculiar Commission*) cannot as well preserve thee at Sea, as at Land, if it be his divine pleasure? Dost thou suppose he cannot also if he please, make thy mornings draughts as dangerous to thee, with *Sophocles*, nay, thy laughing with *Zeuxes*, as the vast and threatning Ocean? He is God of the Seas, as well as of the Land; and whoever thou art that disputest it, thou must re-

ceſſarily be no other or better, than one of the fooliſh ſort of *Atheiſts*; that will acknowledge God in words, but deny him in Actions. Thou wilt be afraid of his Thunder, but yet will not dare to truſt his power and Providence. Thou wilt (perhaps) go to Church and praiſe him, and pray to him with thy Lips, but yet not believe his tender mercies to be over all his works. Thou wilt, and muſt confeſs thou didſt not make thy ſelf, but that thou waſt wonderfully framed in the womb: and wilt thou not believe alſo, that he who by his power formed thee a man at the firſt; can, and will alſo preſerve thee to that punct of time he originally deſigned thee? wilt thou believe Gods power for thy *Origen*, and not for thy *mediums*, and *End*? He that could preſerve *Joſeph* in *Exile*, and *Daniel* in the Lyons Den, and *Jonas* in the Whales belly, can alſo preſerve thee in thy ſayling upon the threatning Ocean. He commands obedience from the Rocks and Waves, as well as from the Hills and Valleys. And all things above and below, in Earth and Heaven, pay him tribute, and acknowledge his omnipotency.

But many again, if they are not able to go over Sea in the capacity of Merchants, preſently cry out, if they go, they muſt be made Slaves. In this alſo the world is miſtaken, and all thoſe noble Plantations in the *Indies* abuſed, and the worth and Induſtry of the Inhabitants much eſcandalized, and undervalued. For thoſe that are termed ſlaves among them (though falſly) I mean thoſe of the Engliſh Nation,) are not in ſo bad a condition as are our Engliſh Apprentices. They, after four years time, having a Plantation appointed them, as the Guerdon of their ſervice; and if they behaved themſelves well in their ſervice, divers other encouragements: but theſe, unleſs they are more than commonly ingenious, or chance to have friends to aſſiſt them at the coming out of their times, do remain either Journeymen, or Slaves for ever; and are often known, many of them to turn either Porters, or Cryers of *Sprats*, *Fackines*, or *Cardmatches*. a lamentable improvement of their ſeaven years ſervice!

Surely, no one in his wit will conclude, his condemnation to cleanneſs of Teeth any advantage; but a curſe and miſery rather, yet ſuch ſorrow is all the happineſs that is entail'd upon thouſands of Perſons of both Sexes, meerly for the ſake of their Lazineſs, and Sluggiſhneſs; and for want of courage to adventure themſelves beyond Sea. Anſwer me, is it not much better thinkeſt thou, (if thou art a man) and more pleaſing to God, to caſt thy

ſelf

ſelf upon providence by a generous adventure beyond-Sea, eſpecially, where many of thy Countrymen by valour and Induſtry have led thee the way, than to live at home Idly, and upon Hectoring, and other to be abhorred courſes; which will infallibly lead thee to the Gallowes in this World, and (unleſs God be the more merciful whoſe glorious providence thou abuſeſt and deſpiſeſt) to a worſe place in the next. And if thou be a woman, what pleaſure canſt thou take in living ſcandalouſly, and in being a common Proſtitute, and ſo for a livelyhood to Court diſeaſes and miſery, making thy ſelf odious to all people of ſobriety in thy younger years, and in thy elder days (if God ſpare thee to raign in thine iniquity ſo long) to become an unwelcome Gueſt to an Hoſpital? Is it not much better I ſay, to follow the many eminent examples that thou haſt before thee, then to run ſuch and ſo diſmal Hazzards? Hereby thou maiſt (invoking Gods bleſſing upon thy attempts) not only prevent ſuch a hated loathſome, and miſerable life, but poſſibly (as well as others) meet an honourable Fortune, pleaſing to God, profitable to thy ſelf, and creditable to thy Family (if thou art of any remarkable,) and advantagious to thy Nation.

Holy Scripture tells us, *there ſhould be no beggar in Israel.* I will aſſure thee, there are no beggars in *Jamaica*. And where there are no beggars there can be no Thieves. 'Tis the neceſſity of the former condition, that always generates the later. But meanwhile, many hundreds live and dy beggars in the nobleſt Countreys of *Europe*. Probably it is an *American* bleſſing particular unto them to be freed from the miſery of want and beggery.

Nor hath the *Weſt-Indies* bin bleſſed with ſo great a good as not to have any beggars among them only; but they have been alſo bleſſed with ſeveral degrees of honour and ſundry eminent Orders of Knighthood, not much inferiour to the greateſt honours now in uſe among many of the *Europians*, in which part of the World, Honour ſeems now chiefly to reſide. As the Knights of *Mexican*. Knights of the *Eagle*. Knights of *Peru*. Knights of *Japan* Knights of *Cinaola*. Knights of *Lyons* and *Tigres*, *&c.* Of all which ſee more in that moſt learned work of the Honourable *Elias Aſhmole* Eſquire, intituled, the Inſtitution, Laws and Ceremonies of the moſt Noble Order of the Garter. *Fol.* 124, *&c.*

And finally, we may ſay of this worthy Province, and that truly, as the ingenioue *Sieure la Colombiere*, in his Treatiſe of Phyſiognomy of the French Nation----*viz.* It ſeems to ſet open a

Temple

'Temple of Humanity for all ſtrangers, to ſhelter them in their 'misfortunes; reſpecting not the Countrey, but the Spirit of a 'Man. It puniſheth none for the accidental fortune of their e-'ducation; but being moved by the impulſe of a candid love to 'Vertue, admires perſons of parts without envy, and affords 'them means to enrich themſelves.--- And to aſſure you of the truth of this Character of the Inhabitants of this noble Country, I could produce many inſtances to confirm every part of it to be ſo; and ſo its probable in another *Annual* Eſſay I may, but here I want both room, and time to do it. Farewell, and be Induſtrious.

Brick-Court by the Deans-Yard, *Weſtminſter.* JOHN GADBURY.

Adverti ſement.

Doctor *Lockyer's* Univerſal Pills being intruſted by him only with his Nephew *John Wats* in St. *Thomas Southwark*, and *Thomas Fyge* without *Biſhops Gate*; and others having falſly pretended to the knowledge of it; This gives notice, that the ſaid Pills are only made by them, and for the prevention of Counterfeits, the Boxes are papered with their names writ therein by their own hands, and ſealed with three *Bores heads* at one end, and at the other end with ſix *Flower-Deluces*, and Three *Spur-Rowels*.

The Names of the ſeveral Governors of *Jamaica*, ſince the taking thereof by the *Engliſh*, in 1655.

It is to be obſerved, that from the year 1655. to 1660. *Jamaica* was under a kind of Military Government; but his Majeſty being then happily reſtored, was pleaſed graciouſly in that year to ſend his Royal Commiſſion to General *D'Oyley*, who was the firſt Governor there for the King. And the Names of the ſeveral Honourable Governors as they ſucceeded each other, are as followeth.

1. THe Honourable General *Edward D'Oley*, was Governor thereof, and he it was that gave a happy begining to Government therein, reducing (by his prudence and policy) the Natives to Engliſh Obedience, which could never be done until his time: He continued Governor thereof until *Auguſt* 1662. Then

2. The Right Honourable the Lord of *Windſor* was Governor thereof; and by himſelf, and the Honourable Sir *Charles Littleton*, continued it until the Month of *May* 1664. at which time---

3. The Honourable Sir *Thomas Modyford*, Knight and Barronet was made Governor of this Gallant Iſland, and he it was that commanded a general ſurveigh thereof to be taken, and this at his own Charge: and under him it began eminently to flouriſh, He continued in the Government thereof, untill *June* 25. 1671.

4. The honourable and valiant Sir *Thomas Lynch* Knight ſucceeded Sir *Thomas Modyford*, and is the preſent Governor thereof, and under him hath this noble Country happily improved, and greatly increaſed in the number of Inhabitants and Planters.

☞ You may take notice that this Gallant Iſland was taken *Anno* 1655. by the *Engliſh* Army under General *Venables*, who left the Command thereof to the Eldeſt Colonel, *viz.* Colonel *Forteſcue*. He dyed, and then General *D'Oley* was principal Commander. Then Colonel *Sedgwick* of *New-England*, being Commiſſioned from the then Power, commanded there. He dyed, & then General *D'Oyley* had the Government thereof again. Then General *Brain* Commanded here, but dying, General *D'Oley* had the Government again, and continued it till confirmed by his preſent Majeſty as above.

A Table readily expreſſing the Intereſt of any Sum of Money from 10 l. to 20000 l. at the rate of 6 l. per Centum.

By the Table foregoing is to be found, the rising and setting of the *Sun* for every day in the year; in the Latitude of *Jamaica*. —It is made so easy that it needeth no example, each particular it pretendeth to be serviceable in, being to be found by inspection only.

This only is remarkably observable in it, *viz.* that it proves to us, the longest day to be about thirteen hours long; and the shortest day to be eleven hours. So that there is not above two hours difference in the whole year round, in the length of their Days or Nights: thereby demonstrateing the Heat of the *Sun* and Coolness of the *Shaddow* to be almost equal unto them at all times of the year, that inhabit this gallant Countrey. Hence it is, they have *Spring* and *Summer* alwayes, but never any *Winter* at all. So curiously equal in temperature is this Province, that it partakes neither of *Heat* or *Cold* in extremity.

Howbeit, they have their times of Rains and Winds to wash and fan away such putrid vapours or fumes as the *Heat* doth either generate or leave behind it; making it both wholsome and healthful to men and Beasts, and causing the Earth happily to fructify; and to yield such abundant plenty, that scarce any Countrey in the World of equal number of Acres, was ever known to exceed it; very few to compare with it.

A Table of the Essential Dignities of the Planets according to *Ptolomy*.

Note that a Planet in his house hath 5 Dignities in his exaltation, 4 in his Triplicity, 3 in his Decanate, 1 in his Term 2. Note also, that the Detriment of a Planet is always opposite to his house, and his fall to his Exaltation: and herein he receives as many Debilities, as in the other Dignities.

January hath xxxj. days.

First. Quarter the 5 day at 2 in the morning.
Full Moon, the 11 day, at midnight.
Last Quarter the 18 day, at 4 in the afternoon.
New Moon, the 26 day, at 3 in the afternoon.

Observations.

On the 13th. day about midnight may be seen the Moon in Conjunction of that glorious Star, *Spica Virginis* somewhat past the mid-heaven, going toward the Westward.

The beauty of the Heavens is so excellent and ravishing, that it may well invite us to an Observation, if not strike us into Admiration of his unsearchable wisdome and power, who guideth *Arcturus* and his Sons.

First Quarter, 5 day, at 4 morning.
Full Moon, the 10 day, at 8 night.
Last Quarter 18 day, at 9 at night.
New Moon, 27 day, at 2 morning

Observations.

On the second day of *March* about 7 or 8 at night the *Moon* passes by the *Pleiades* in the *West* part of the Heavens, the *Virgids Spike* just then rising above the *Horoscope* in *Jamaica*, *Barbadoes*, &c.

I desire the Ingenious *Meteorologist* to observe, if in *Jamaica* there be not a remarkable charge of Air about the later end of *March*, perhaps upon the 27, 28, 29 days thereof. I suspect great winds and Rains; and dare lay a wager it will not fail them.

A First Quarter the 3 day, at 1 in the Afternoon.
— Full Moon, 10 day, at 4 in the morning.
☾ Last Quarter, 17 day, at 4 Afternoon.
11 New Moon 25 day, at 4 Afternoon.

Upon the 12th day of *April* about 8 or 9 at night the *Moon* will be seen with *Antares* or the *Scorpions* heart, in the East part of the Heavens, in the Island *Jamaica*. And the benign Planet of *Jupiter* will curiously lead them toward the point *Culminant*, -----Thus will the orderly motions of the starrs praise the Lord, according to the Royal *Psalmist*.

First Quarter, the 2 day, at 6 eveniug.
Full Moon, 9 day, at 3 in the Afternoon.
Last Quarter, 17 day, at 9 in the morning.
New Moon, 25 day, at 3 morning.

4	14		2	♂		22		5 A. 11	At or about midnight, *Saturn* and *Mars* rise in the *East* to the Inhabitants of *Jamaica*, very neerly in Conjunction, they may be seen thus several nights together towards the later end of the moneth; and yet they perfect not their Conjunction in this moneth, but in the next. Conjunctions in *Aries* are of concernment to *Jamaica*, and other parts of the *Indies*, 'tis therefore worth an observation of them.	11

Observations.

The many Configurations that happened in the last month, and that will fall out in this, are the precursors of much variety of business to the Inhabitants of the *Indies*: *Venus* is in their *Agathodaimon*, and may preserve them (*sub Deo*) that live in *Jamaica*, when other parts of the *Indies* suffer. *Hispaniola*, is now, or near these months menaced with many unhappinesses; ♃ is under the Dominion and power of ☌ and is in □ of him in the Genesis of that noble Island.

☽ *Eclipsed* at 2 P. *M.*

Observations.

If *Libra*, or the *Celestial* ballance, be the *Horoscope* of *Jamaica*, as without doubt it is; then is that gallant Country eminently befriended at this time; many persons and Countrys begin notably now to trade thither that were fearful of such adventure formerly; and many Families begin to think of planting themselves there; and may no doubt to good advantage. *Venus* is now in ♎.

Observations.

On the 10th day of *September* about 9 or 10 at night, the *Moon* may be seen to touch the Pleiades, as they rise together in the *East*, in the Island of *Jamaica*. *Saturn*, by a *Retrograde* motion, marches in the *East* before them, who is he that will allow of the differences and vertues of *Gems*, and yet will deny to me the use of the different vertues and influences of the *Diamonds* of Heaven?

Full Moon, 4 day, at 2 in the Afternoon.
Last Quarter, 12 day, at 6 in the morning.
New Moon, 18 day, at 9 evening.
First Quarter, the 26 day, at 4 morning.

Observations.

Observe I pray, ye, the various Face of Heaven that will be shewn you upon the double opposition of the *Sun*, *Saturn* and *Mercury*; and tell me if you have not greater storms of Rain, Breezes of winds, *Hurricano's*, &c. then at other times when no such configurations are in the Heavens. If you find my conjecture true, believe with me then, that there are such things in Nature, as Starry Influences.

Full Moon, 3 day, at 7 in the morning.
Last Quarter, 10 day, at 4 Afternoon.
New Moon 17 day, at 9 morning.
First Quarter the 25 day, at 1 morning.

Observations.

I may erre; bmt yet I strongly fancy, that the first part of this moneth will produce, in *Jamaica*, store of Thunder and Rain; by reason of the *Oppositions* of ♂ to the *Sun* and *Jupiter*, and yet I am of opinion that the later part of the Moneth will prove kindly and pleasant, unless on the 16 or 17 days there fall a little moisture. You may be sure I fix it upon the □ of ♄ and ♀.

Full Moon, the 2 day, at midnight.
Last Quarter the 9 day, at 11 at night.
New Moon, the 16 day, at 11 at night.
First Quarter the 24 day at 10 at night.

THE VVEST INDIA Or *JAMAICA* ALMANACK 1674.

The Second Part.

Exhibiting the Revolutional Scheam of the year, with an Astrological judgment thereon.

As also, a brief Account of some of the many Commodities of the growth of that Rich and fruitful Island, which of late years hath been so admirably improved by the *ENGLISH*.

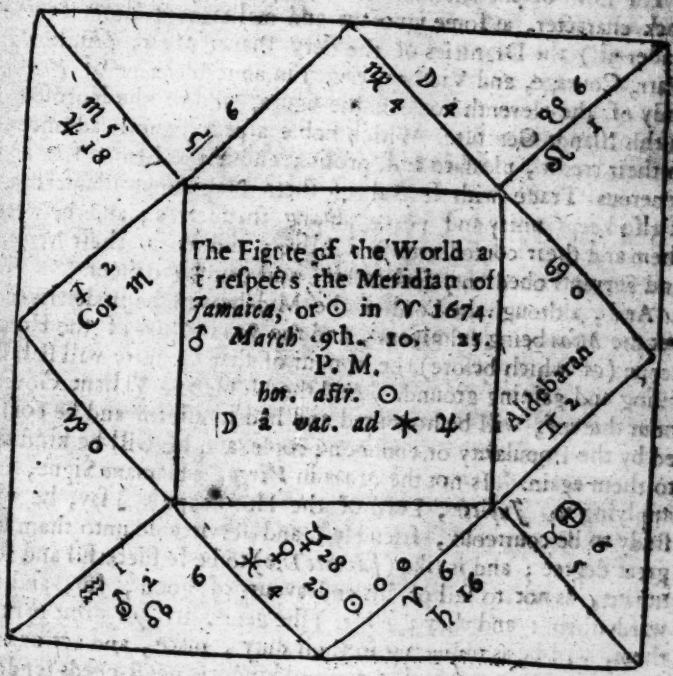

By JOHN GADBURY Student in ASTROLOGY and PHYSICK.

Go to the Ant, thou sluggard, consider her ways and be wise: which having no Guide, Overseer, or Ruler, Provideth her meat in the Summer, and gathereth her food in the Harvest. How long wilt thou sleep, O sluggard? when wilt thou arise out of thy sleep? Prov. c. 6. v. 6, 7, 8, 9.

London Printed for the Company of Stationers.

BIBLIOTHECA BODLEIANA

Astrological Observations on the year 1674. For the noble Island Of *JAMAICA.*

Before I can conveniently proceed in my judgments on this year, 'tis fit to consider what ground I am to proceed on And that is the figure of Heaven at the Sun his entring *Aries* in that Noble Island; and it appears in such a shape as you see here represented to your view.

In this Cælestial Ingress, we find the Regal Sign *Sagittary* to

 ascend

aſcend on the Eaſt Angle, and the Sun in Trine thereunto from a Royal Sign alſo; which poſition eminently elevates the Conceptions and Spirits of thoſe Gallant perſons that have the Government and Poſſeſſion of that fertile Iſland, and in this Revolution produces them into ſuch and ſo noble and glorious Acts and undertakings, that the Enemies unto them, or ſuch as ſhall oppoſe them, or be oppoſed by them, will tremble to think of them, or their approaches.

The Lord of the Aſcendant is in *Scorpio*, (a Sign not of ſuch a black character, as ſome ignorant and malicious fellows ſeem to render it) the Dignities of the fiery Planet *Mars*, (Author of Warr, Courage, and Victory, *&c.*) in amicable trine of *Venus*, Lady of the eleventh houſe in the figure, and of the Horoſcope in this Iſlands Geniture. Which noble aſpect happily advanceth to their credit, pleaſure and profit; and gives them a free and generous Trade with ſeveral of their Neighbour Plantations. It alſo keeps unity and peace among themſelves, and between them and their confederates and Allyes; and makes their *Negroes* and Servants obedient, ſerviceable, and gainful to them.

And, although the Lord of the Mid-heaven be in detriment, yet the *Moon* being culminant, and the *Sun* in *Trine* of the Horoſcope (of which before) the honour of that Country will ſtill be riſing and gaining ground. And the Noble and Valiant Governour thereof, will be honoured and had in eſteem and be courted by the Popularity or common people, and he will be kind unto them again. Is not the *Moon* in *Virgo*, a Humane Signe, and applying to *Jupiter*, Lord of the Horoſcope? I ſay, he will ſtudy to be courteous, friendly, and ſerviceable unto them in a great degree; and is like (*favente Deo*) to be ſo ſucceſsful and fortunate, as not to fail of his endeavours of good, for, and towards them: and they, (*i. e.*) the generality, or great part of them, will be as obligeing in their duty, place, and actions towards him again, which reciprocal kindneſs, muſt needs render a Governor and People happy. And that which makes me the more aſſured and confirmed herein, is the *Medium Cæli* in that Iſlands Geneſis, is touching the *Sextile* of *Sol*, by Direction, and he Lord of hopes and friendſhip therein. A direction, that will certainly bring as much honour friendſhip, ſucceſs, and advantage to that gallant Country, and to the Governor, and Government thereof, as the ſame ſignificator to the oppoſition of *Mars*, ſome few years ſince, brought diſcontent trouble, diſcompoſure, *&c.*

unto

unto them. It is a beam of noble ſignification in earneſt; and as the Nativity of that Iſland ſtands, might deſerve a far larger Comment, then my alotted Paper will at preſent permit me to afford it. Its poſſible I may reſume the conſideration hereof in my next years pains for *Jamaica*; for its Effects extend themſelves thither.

The Planters and Inhabitants of this gallant Countrey, will generally be very proſperous and floriſhing, and increaſing in Riches and the goods of fortune, their dry years are (God be bleſſed) paſt them, as well as their *Medium Cæli* is paſt the oppoſition of *Mars*, (who will deny that heat and dryneſs is *Mars's* Nature and temper?) and now *Cocao* may, as formerly, yield fifteen hundred, or two thouſand weight of nuts yearly, by the Acre; and Sugar may give to the owner, four or five thouſand weight per *Annum*, per Acre, and *Indico*, *&c.* may yield as formerly (before ſuch Martial drying influence attended them) they were wont.

The *Moon* is applying to a *Sextile* of *Jupiter*, and this in the tenth Angle of the figure, and he in a fruitful watery ſigne, as the *Moon* in an Earthy one; as if the kind Heavens, were by their more benefique influences, courting that happy Countrey to receive from them its Rain & fruitful Seaſons, and this to their conſiderable nay, remarkable advantage and profit in this Revolution. If *Indico* have formerly yielded twelve pounds, or fourteen pound ſterling, *per Annum*, *per* Acre, for every *Negro*-ſlave that works upon that commodity, it is now likely (by Gods goodneſs in this Revolution) to yield them ſixteen, ſeaventeen, or eighteen pounds *per Annum*, *per* Acre, poſſibly more, and ſo proportionably all other terrene productions

The *Sextile* of the *Sun* and *Mercury* to *Mars*, (a conſignificator of this Iſland in this our Mundane Scheam) and all in good Aſpect to the Horoſcope, inſtils Reſolution and Courage into the Hands and Hearts of thoſe brave Souls, that are appointed to deſcend this Iſlands Peace, *viz.* ſuch as the valiant Major General *Morgan* (if among them) Colonel *Biudlos*, *&c.* who have bin the ſcourge of this Countreys Imperious Enemies; with all the reſt of the worthy Commanders there.

Mars is in *Aquarius*, the dignities of *Saturn*, which makes thoſe ſtout and worthy perſons, gravely deliberate and ſerious, as well as couragious, in their greateſt deſignes and actions, and not haſty to attempt any thing upon their Adverſaries, without pru-

dent Conſultation and debate firſt had thereupon.----But, ſure I am, Action, and that great and conſiderable, in this Revolution, they will attempt, undertake, and engage in; and herein (according to natural cauſes, and further I meddle not,) cannot fail of being proſperous and ſucceſful.-----I will acknowledge to them (leaſt my envious Antagoniſt ſhould deem me partial) that *Jupiter* is in the twelfth houſe, and his poſition there, may make ſome diſcontented, cowardly, troubleſome people among them [there is no Countrey without ſuch Cattle] to be, not naturally, but politiquely fearful; and thence apt to coine Jealouſies and ſuſpitions where none are to be feared. But againſt this, I (under God) aſſure them, that the ill Angel is departed from this noble province; and (according to humane foreſight) is not like to return again unto them in many years, perhaps ſome Ages.

But now, among all the Arguments of Favour and encouragement to this gallant Countrey, I cannot (without being deemed partial) but take notice unto them, that *Saturn* is in the fift houſe of this Revolutional figure; which intimates aſtrologically, even their pleaſures and delights to be a little treacherous unto them; and admoniſheth them to be watchful againſt Surfeits and Feavers, *&c.* (♄ is in ♈) and the ill conſequences of a pleaſurable and delightful Society, in the worſt ſence. It alſo bodes ill to women with child among them, with many hard Labours and Abortions; and danger, generally to Children that are already born among them. But the general fate of this gallant Countrey being now admirably good, one particular ill poſition cannot materially contradict or controul it.

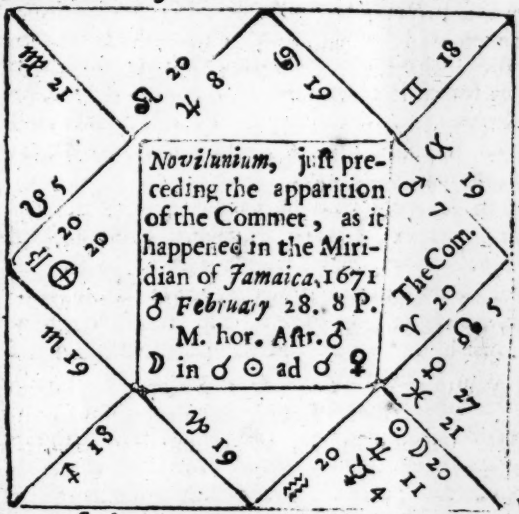

But paſſing this their Revolutional Figure, and all further judgments thereon, I ſhall in the next place conſider a little of the late Comet that appeared in this noble Iſland, of which my worthy and ingenious friend, Captain *William Ryves*, gives me an account in theſe words----*viz.*

I had not time in my laſt to acquaint you of the appearance of a Comet, which I ſaw on the fift, ſixt, and ſeaventh, inſtant, (*viz.* of march 1671.) in the evening, it was in the later decade of *Aries*, its motion hath ever ſince bin equal, about two degrees in twentyfower hours; for I have ſeen it almoſt every night ſince this laſt night, (*viz.* March the 23.) I ſuppoſed it had enter'd *Gemini*, and had not above three degrees of north latitude, when at firſt it had ſometimes twenty degrees, or thereabouts, it appeared very cloudy, and but of ſhort Rays, extending not above two

or

or three degrees toward the North-west. Thus far this my worthy Friend.

But now, because the time of this Comets first appearing or shewing it self, is uncertain; 'tis necessary that I present you with the figure of Heaven of the New Moon preceding the same, according to *Cardan*, and other Astrologers, and it is thus in the Meridian of *Jamaica*.

I know it is a question among Naturalists, whether a Comet be a Sign or a cause of future accidents to happen to, and afflict Mankind. I know also they are a *Phænomena* uncertain, and observe no particular orknown laws in their times of appearance, or in their motions when they do appear: so that Men (howsoever learned or illuminate) cannot from any ground Philosophical, predict when they will appear, nor yet how they shall move, or with what celerity or tardity, when once they become visible to us.

That they are ever attended with more than ordinary Effects is commonly known to all the Learned in the syderal Science, but that they are the causes of such accidents that frequently attend them, is very reasonably doubted; since the motions and locations of all the Causes of things that are cognoscible to humane kind, are to be discovered by them, and the times of their regencyes known unto them. Thus Eclipses of the Luminaries Returns of the Planets, great Conjunctions, variation of the Aphelions, are all known to men, and may be pointed out exactly by them, for an hundred nay a thousand years to come, (I do not say so easily) as truly, as for two years only. But this of the motions of Comets or times of their appearance, is not in the least

ſubject to humane skill or ſcrutiny; and therefore impoſſible to be diſcovered by him or his Science. A ſigne do I therefore conclude it to be, and not a cauſe of future evil. As the Circles about the Sun and Moon, are Signs of winds and tempeſts ſoon after to follow, but not the Cauſes of them; thoſe being the privileges of the Planets only, by their motions and Aſpects, *&c.* in the Heavens.

That is properly and naturally termed the cauſe of a thing which manifeſtly and forcibly puſheth on, or helpeth forward to the bringing to paſs the Effect. A Cauſe is neceſſarily required to the working an effect. So the learned *Richardſon* in his notes upon *Ramus*. As the Spring in a watch is truly the cauſe of it, Motion; and the circulation of blood the abſolute natural cauſe of vitality.----But a Signe is of another nature. The Kings, or Biſhops, or Cardinals head, *&c.* at a Tavern door, may intimate or ſignifie to you there is wine to be ſold; but it is the grape and a kind Vintage, that is the cauſe of wine.

But be it then, not a Cauſe, but ſigne, of future accidents it muſt then truly ſignifie, and as a Signe, it ought to be conſulted with cauſes. And therefore it is (as Intimated before) that Aſtronomers, *Cardan*, and others, ever conſult the New, or Full-Moons preceding ſuch apparitions, in giving Judgments upon thoſe things, which they may reaſonably be preſumed to ſignifie. for.----

Nullus Cometes qui malum nullum ferat.

according to the Greek adage, or proverb---- Μηδεὶς Κομήτης ὃστις οὐ κακὸν φέρει. (1) Never did any Comet yet appear, but it was the Meſſenger of miſchief, and brought ſome evil unto mankind along with it. Let us therefore, according to the rules of Aſtrologie conſider the New-Moon-Figure pertaining to it, as I have before ſet it down.

In this Figure of the New-Moon we find the Heavens (*in reſpectu zodiaci*) placed as in the Nativity Scheam of *Jamaica*, as may be ſeen by the laſt years Ephemeries for that Countrey; and the Moon is transferring the light of the Sun, Lord of the eleventh to *Venus* Lady of the Horoſcope, which admirably well agrees with the general Fate of this Province, and with the kind ſignifications of this particular years Revolution; and plainly intimates (though Comets bode no good of themſelves, yet conſequentially they may,) a growing glory to this noble Countrey; and that the Inhabitants thereof ſhall increaſe in honour and gain;

that

that they ſhall be happy both in, and by Servants, &c. and will thrive in *Animalibus minoribus, &c.*

The angry Planet *Mars*, (this Nations Enemy) is in detriment and *Venus* her particular Patroneſs is exalted, which prenotes the Enemies of the Engliſh Nation in the *Weſt-Indies*, to fall into a low and diſtreſſed condition, whilſt they themſelves grow proſperous, like to the weights of a *Pendulum-Clock*, while one goes down, the other advanceth proportionably.

The *Sun* is Lord of the eleventh in this Scheam, and is received of *Jupiter*. There is hopes in earneſt that the valorous *Jamaicans* will increaſe and augment their honour and ſubſtance, from the diſhonour and leſs of their publique enemies: and this by a generous and couragious attempting of ſome Iſland, or place of ſtrength and Riches now in their poſſeſſion. *Jupiter* is a Mineral Planet, and ſeems to deſigne Gold to the honourable and valiant Engliſh, as well as to their grave and ſupercilious Adverſaries, whoſe avarice is ſuch, that they would willingly rake together and hoard up all for themſelves.

And that the Learned Aſtrologians of any Countrey whatever, may ſee and know, that this Comet; with the New-*Moon* Figure preceding it, points out and ſignifies miſchief to befall *Jamaica's* Enemies, and not to happen unto themſelves; let them take notice that it firſt of all appear'd (or was obſerved ſo to do, at leaſt,) in the ſeaventh Angle in the *Noviluniun* mentioned, and alſo in the ſame Angle in the Geneſis of that gallant Iſland, which they muſt needs know ſignifies not them, but their publique and moſt avowed Enemies. It appeared in *Aries*; went through all *Taurus*, and diſappeared in *Gemini*. Let us hear what Aſtrologers ſay to this?

If any Comet or new Star ſhall appear in *Aries, ſignificat malum, &c.* it bodes dammage to the Eaſtern people, *&c.* (*i. e.*) to ſuch as are Eaſtern by ſcituation from the place of its appearance, for the terms Eaſtern and Weſtern, *&c.* (as the learned Author of *Pſeudodoxia Epidemica*, hath excellently urged) are ſo in reſpect of ſome places ſuppoſed or pointed out, from which you are ſo to eſteem them: and it is an hard matter to prove they inherit ſuch appellations from a right in Nature. Howbeit, ſtill it denotes miſchiefs and prejudices to befall this Iſlands Enemies, and not themſelves. But to go on——

When any Comet or blazing Star ſhall appear in *Taurus, ſignificat malum eſſe hominum, & paucitatem bonorum, &c.* It beto-

kens much evil to befall mankind, a leſning of their goods and fortunes: they will injure, and rebel one againſt another in thoſe Countries or places ſubject unto the Signe in which it firſt ſhewed it ſelf. It alſo denotes the death of ſome great and eminent perſon, either in Church or ſtate; together with many miſchiefs and Captivities; and in a manner a Licenſe for, or toleration of all manner of evils. It alſo denotes detriment to the greater ſort of Cattle, ſerviceable to mankind, as the *Horſe*, *Ox*; *Cow*, *&c.* terrible winds; a corruption or putrefaction of Corn and Fruit; great Earthquakes in many places, and cold pinching winters, (that cannot touch *Jamaica* I am ſure) great ſickneſſes to reign among men, proceeding from corruption of blood.

But this Comet did not only ſhew it ſelf in *Aries* and *Taurus*, but in *Gemini* alſo. Hear what Authors ſays unto this likewiſe. If a Comet appear in *Gemini* at any time, *ſignificat apparitionem laſciviæ atque fornicationis, & inceſtus veneri cultus in hominibus, &c.* It intimates men to be laſcivious, and apt to commit fornications to be in love with inceſtuous courſes, and to neglect goodneſs and the true worſhip of God. It bodes alſo ſtrifes, quarrels, controverſies, wars and diſſentions, grievous diſeaſes, whence many Children dye, and young men or youth in abundance. Many abortions and damages to women with Child; a deſtruction of Birds, Famine and want; Thunder and Lightnings, prodigious lofty winds, blowing down Trees by the Roots, and doing otherwiſe very much harm,-----See my diſcourſe of Comets, wrote upon occaſion of the three blazing Stars 1664. and 1665. that preceded the great Plagues, Fires, Wars, *&c.* in *Europe*, which have ſince happen'd.

All which miſfortunes attend the Enemies of *Jamaica*, the Comet falling in the ſeaventh houſe of the *New-Moon* preceding it.

I ſay again, the noble *Jamaican*, and the generous inhabitant of *Barbados*, *&c.* need not be afraid of this Cæleſtial Monſter the Comet, it bodeing all the forementioned prejudices, not to them, but to their Enemies. Howbeit, under an active conſideration they may, and I believe will be concern'd therein, *viz.* in helping to pull down the pride of their Adverſaries; who would needs climb up to, or mate Heaven with their Ladders of Gold and Gaudery: they that were formerly ſo ambitious and lofty as to think it ſcorn ſo much as to trade with their Induſtrious Neighbor Nations; nay would ſcarce vouchſafe to commune with them;

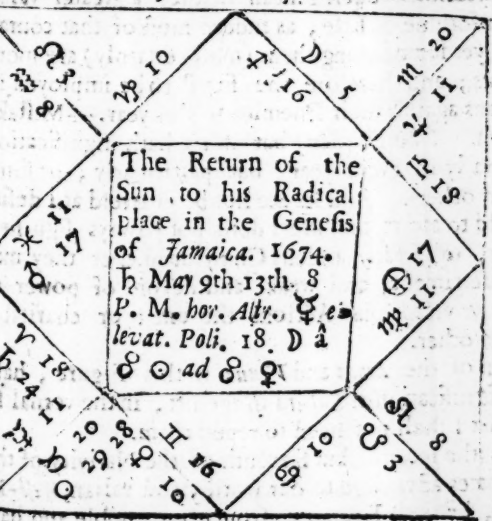

m can-

mean while forgetting themſelves to be men, and that the Earth and the fulneſs thereof is the Lords, who firſt made it, and hath moſt certainly, not only a juſt right, but abſolute power to give or diſpoſe it to whom he pleaſe ---I ſay, theſe people &c. are ſo far Menaced by this Comets appearing, and are thereby threatned to be brought into a ſtate and condition ſo low, as that (in few years) they will be glad to Petition thoſe they formerly derided, and diſdained to trade or traffique with: and poſſibly for the like things they had formerly denyed unto them.

I will not ſay how ill the noble Major *William Beeſton* and thoſe ſtout and valiant Engliſh men with him, were uſed about Proviſions, *&c.* when he was neceſſitated, *Anno* 1671. although he deſired nothing but what he would generouſly have paid for.

Howbeit, I doubt not, but that worthy Gentleman, with the reſt now in *Jamaica*, *&c.* will live to ſee others compelled to court and ſue to the Engliſh inhabitants there, for a ſupply of their own hardſhips and neceſſities, when they will be moſt unwilling to receive from them a denyal,

And ſo I am come in the laſt place, to conſider of the Revolutional Figure of the Nativity of *Jamaica*, as it happeneth in this year 1674. For the Returns of the *Sun* are in all Radixes of eminent uſe, and not by the Artiſt to be forgotten: but in this of more than ordinary concernment, becauſe it ſomewhat harmoniſeth with the former mentioned Figures, and happily enforceth the former Aſtrological Judgments.---The figure is this.

Here you ſee is an active Face of Heaven in earneſt; and admirably concurs and conſpires with the former

former mentioned ſignifications of courage and ſucceſs which attends the noble inhabitants of *Jamaica*, *Barbados*, *&c.*

Jupiter in the dignities of *Mars*, is Lord of the Aſcendannt, as well hear as in the former Figure of the *Sun* his entring *Aries*; and in great reception, and trine of *Mars*; and the *Moon* is returned to her Radical place in that Countreys Radix, which conſiderably enforceth the former mentioned Judgments and heightens the Spirits of thoſe gallant perſons that have the command and power among them. 'Tis *rarum quid*: a thing that ſeldome happens, and ſcarce to be found in the records of Aſtrologie, that the *Sun* and *Moon* ſhall both make their returns in one and the ſame Figure of Heaven; and therefore cannot bnt be attended with a conſequence ſuitable. The effects ever bear a proportion to the cauſe that moves them; if that be eminent and glorious, ſo muſt this alſo prove.

Mars in the Aſcendant in ſuch friendly ray and reception of *Jupiter*, as I before noted, and *Jupiter* being in partil oppoſition of *Mercury*, Lord of the 7th. in this return, as well as in the vernal Figure, intimates ſome brave, bold, adventurous Action or Actions to be attempted ere this Revolution be run fully out, moſt worthy the honour of the noble undertakers thereof. Perſons of Martial daring Stars, or Nativities, are the moſt proper to be employed in ſuch Actions. Such I mean that ſet a greater value upon honour than fortune or Life, as indeed moſt of that courageous Nation do; yet ſome among them, (moſt certainly) are more martial than others; and therefore the fitteſt to be imployed in the greateſt Actions againſt their Enemies in this year.---Miſtake me not, I pray you. I do not deny but *Mars* hath ſignification of Soldiers generally in every year, but particularly, in ſome years more than in others. And let me not be quarreld at, I deſire you, if I am bold to aſcert that *Mars* doth not always ſignifie a Fortunate Soldier, or *Jupiter* a pious Churchman, *&c.* they may be ſometimes in detriment, and weak, and devoid of power to perform glorious or victorious Actions the one: or charitable Religious ones the other.

The oppoſition of the *Moon* and *Venus* in this Figure, hath nearly the ſame ſignification as *Saturn* in the fift, in the vernal figure hath; ſo that I ſhall not need to repeat them.

And *Saturn* in the ſecond, but ſeaventh of the Nativity of this Countrey, intimates advantage to our worthy and valiant *Weſt-India*-Engliſhmen, by their Enemies, from great, noble and hazzardous

zardous encounters with them, but if that alone should be presumed to have some signification of a *Saturnine* Imbezlement of part of that which may be gained by Martial prowels and Courage; I say, the other many good significations help happily to meliorate; nay its possible, wholly to frustrate and divert all such *Saturnine* menaces.

And thus much shall serve for our Judgments Astrological upon the Actions and Affairs of our honoured Countrymen now possessing *Jamaica* and other parts of the *West-Indies*, in this Revolution, 1674.

Soli Deo Gloria.

Of ſome of the Commodities and growth of the Noble Iſland of JAMAICA.

HAving ſpent a great part of my alotted paper for this year in my Aſtrological judgments beforegoing, I muſt pray the patience of the ingenious Merchant and Seaman, if I cannot before the next year furniſh him with the principal growth and manufacture of this noble Iſland. Yet by reaſon of my laſt years promiſe I will inſert ſome of the many eminent advantages this noble Country affords, for the ſupport of Life and Trade, but becauſe of all terrene bleſſings, Life is the moſt Excellent; chiefly, if thereunto health be adjoyned, I ſhall preſent you with a brief account of what proviſion there is to be found in great plenty for the maintenance of Life and Health, *viz.* both of Fleſh and Fiſh, *&c.* as I received it from the hands of the Honourable Sir *Thomas Modyford* Knight and Baronet, who was Governor not only of that noble Iſland many years, but of the *Barbados*, and other places of the *Weſt-Indies* many more: and therefore certainly the beſt of any acquainted with the truth of theſe things, which take as followeth.

Firſt of Cattle.

Jamaica yieldeth great plenty of neat Cattle, as the *Ox*, *Cow*, *&c.* So that they were in *Anno* 1672, reckoned to be 70000 head at the leaſt, from whence the Inhabitants draw as good *Veal*, *Butter* and *Cheeſe*, as in any place is to be had, or can be deſired.

They have *Muttons* in great plenty, and thoſe dayly increaſing, from whence they have alſo *Lamb* at times ſeaſonable.

They have likewiſe great ſtore of *Goats*, *Kids*, and abundant plenty of both wild and Tame *Hoggs*, with their produce, which is in that Countrey very great and conſiderable.

Rabbits thrive very well there, and begin to be of good advantage to the Inhabitants. And they have a few *Deer*: ſo that it is hoped that in little time they may alſo be bleſſed with plenty of *Veniſon*.

As to Cattle for ſervice, they have excellent *Horſes*, *Aſſes*, and *Mules*, and at very reaſonable rates, which ſerve for Draught and Carriage. They have *Doggs*, *&c.* of ſeveral kinds, both for ſervice and pleaſure.

Secondly, of Fowl, Tame and Wild.

For Tame Fowl, they have gallant large *Turkeys*, and Dunghil Fowl of ſeveral breeds. Then they have delicate *Muſcovia Ducks*, as large

Large again as our Engliſh Ducks. They have likewiſe plenty of *Geeſe*, *Peacocks*, *Tame Pidgeons* wondrous Fat and good. All which are eaſily reared, and made excellent meat, with *Indian* Corn only, eſpecially the *Capons* and gelt *Rabbits*.

The wild-Fowl are---

Geeſe, fower ſeveral ſorts of *Ducks*, *viz.* the *Grey*, white-bellyed, the whiſtling *Duck*, and *Bald-pates*. They have *Teal*, the fatteſt in the world. *Plover*, and *Snypes* they abound in. Then they have *Pidgeons* Iſland, and Mountain; the laſt as big as two of ours. They have alſo *Turtle-Doves*, *Cocao Birds*, half as big as a *Lark*, very fat and good, exceeding ſweet alſo. They have *Guiny-hens* as good as any *Pheaſant*. Then they have fine *Singing-Birds*, plenty of *Parrets* and *Parakito's*, great enemies to the Corn and Orange. They have alſo *Maccaws*, *Cormorants*, *Paſſflemingoes*, *Caryon-Crowes*, and *Pellicans* ---

What Fiſh they are furniſhed withal.

Thy have the green *Turtle*, and *Logger-head*. The laſt they take chiefly for its ſhel, which they put to good uſe: the former is excellent reſtorative meat. Then they have the *Manatee*, *alias* the *Sea-Cow*, which is excellent firm meat. Then have they *Snappas*, and *Snouts*, as large as a *Salmon*, but the meat more firm than that. They have abundance of *Cropers*, whoſe head is as good as a *Cods-head*. They have alſo the Spaniſh *Muckbirt*, a ſmall, but an admirable ſweet fiſh. They have excellent *Mullets*, brave ſilver *Eeles*; but their Mud-fiſh are ſomewhat luſcious. They have curious *Lobſters*, but without Claws; *Shrymps*, *Oyſters*, *Prawns*, *Craſh*, all ſingular good in their kind. Then have they the *Land-Turtle*, (a fiſh ſo called) and *Allegators*, which laſt, the *Negroes* only eat, and they do hunt eagerly for them, as holding them an excellent meat. Neither are they ſo terrible as is reported: and it is very rare to hear of any miſchief they do, they being afraid to ſee, much more to come near a man.

For their Bread and Drink, &c

In this noble Iſland there is a ſhrub grows, the root of which they call *Caſſani*, it is as big as a mans thigh, and is above a year a growing. Of this Root excellent bread is made, and alſo a wholſome cooling drink, called *Perino*. Which is the principal and more general Bread and Drink of this *Countrey*, and is by experience found moſt proper for this Iſlands inhabitants. The juice thereof, being through coldneſs, reputed poyſon, but the ſubſtance being dryed and baked, makes moſt temperate bread. So that

this

this Root alone ſupplies the uſe of *Wheat* and *Maulz*.

There are ſundry other Roots and Fruits which ſerve for food and drink, that I have not room to mention, as the *Potata*, the *Teavoy*, *Edye*, *Limes*, *Peaſe*, *Beans*, *Aſparagus*, *Cabidge*, *Pumkin*, &c. *Pine-Apple*, the *Turkey-head*, *Prickle Pears*, *Muſk-mellons*, *Water-mellons*, *Squaſhes*, *Maſk-Cod*, *Indian Corn*, *Guinny Corn*, *Piſtachio's Purple-Beans*, *Bonaviſta*, *Vinillios*, *Oranges*, and *Lemons*, *&c.* Of all which I ſhall by Gods bleſſing entreat of diſtinctly in my Labours for that Iſland in enſuing years; they being too many, and their virtues too numerous, to be all of them included in a ſmall Almanack; they muſt therefore take larger room to breath in, they'l take me two or three years Almanack room at the leaſt; and this although I ſhould but ſparingly deſcribe them; if therein I mention any thing by way of *Aſtrological* Prediction. And if I ſhould not, I muſt then run the hazzard of diſobliging many of the ſons of Art among them, eſpecially ſuch of them, as have invited me, by their particular obligations, to the performance of this Annual ſervice. A thing I may in no wiſe omit. I will therefore endeavour to ſerve both the generous Artiſts, and the generality of the Inhabitants together.

But now *Barbado's*, &c. being inhabited by the *Engliſh*, as well as *Jamaica*, and both under the Dominon of our Soverainn Lord, King *Charles* the Second, I hold it very proper for the ſervice of that noble Countrey, to annex unto theſe our *Jamaica* obſervations, a Domifying Table for the *Barbado's* Iſland particularly, that this little book may be of portable uſe to all the Engliſh inhabiting the *Barbado's*, *Nevis*, *Antego*, &c as well as unto the Noble *Jamaicans*; the Ephemerides of the Planets motions and Aſpects, though particularly referred to *Jamaica* ſerving (without materiall Error, at leaſt in common things) the ſeveral aforeſaid Noble Iſlands, as well as that for which it was calculated and principally deſigned. Take it as followeth.

I Need not trouble you here with Inſtructions how to ſet a Figure of Heaven, that every little Synopſis of Aſtrologie doth, as alſo the Introductions to that Science; beſides, the perſons that ſhall chiefly make uſe of this Domifying Table, are generally ſo much *Artiſts*, that they are acquainted with the principles of *Aſtrologie* already, ſo far as the ſetting of a Figure comes unto; it were therfore wholly needleſs to do it here.

As for the difference of *Meridians* between *Jamaica* and *Barbados*, *Mævis*, *Antego*, &c. It is ſo inconſiderably ſmall, that in common Figures it breeds no ſenſible error. But when you are to erect Figures for *Nativities*, you ought then to be more exact and curious in your operations; and for your better aſſiſtance therein, conſult either the Tables of *Regiomontanus*, *Argol*, or *Maginus Matius*, &c. but for ſuch as do not underſtand the *Latine*, they may be conveniently aſsiſted by the Rules and Tables in my Doctrine of *Nativities*, printed *Anno* 1658. which Book alone is ſufficient to inſtruct them both in the *Calculatory* and *Judicatory* parts of any *Nativity* whatever. And ſo I conclude this my *Weſt-India*, or *Jamaica* Almanack, for the year 1674.

POSTSCRIPT.

Ad Lectorem.

NOtwithstanding these my Labours for the honoured *English* inhabiting the *West-Indies*, I also continue my accustomed DIARY or Almanack for my Native Country, the difference of Latitudes and Longitudes being so great between the *Indies* and *England*, that I cannot with any conveniency bring them into one Annual Book. Besides, the effects or Influences of the Heavens in respect of mundane Alterations, are quite different in one place to what they are in the other; and as the Astronomy, so must the Astrologie which serves both, differ.

Back-Court by the Deans-Yard, *Westminster*. JOHN GADBURY.

Advertisement.

THE *English* Empire in *America*, described in a Map containing 6 foot in length, and 4 foot and a half in bredth, &c. with pertinent descriptions down the sides and under the Map, of each Country therein contained, declaring their Laws, Customs, and Policies, their strength, manufacture, and manner of Living, &c. Set forth by *Joseph Moxon*, Hydrographer to the Kings most excellent Majesty, and sold by him on *Ludgate-Hill* at the sign of *Atlas*, price 16 s. pasted on Cloth and Coloured.
